### Title

Marriage word may have several meanings to everyone. For some people it may consider as responsibility and for others its mean real love and romantic life or others will consider it a new hope, new life and a bright future. No one denies the importance of marriage and it is the most important value in this life is marriage and with marriage life will goes on. But the concept of marriage is begin to change in recent years than it was in the past and new concept of marriage become to this generation.

In the past, people married at a young age and this was due to several reasons and the most important reason is the life was so simple and also the boys become a men in early age and that because he will work to earn money or he will help his father and that would make him bear the responsibility. It's also the same for the girls, girls become women in early age and that because she will do the house work and she will help her mother in household chores and that would make her bear the responsibility. In the past, a boy or girl need less time from now to realize the responsibility that lays on his/her shoulders and that because the environment which they live and that made him/her feel more responsible about them self.

But in these days the idea of marriage does not come in early age and if we notes the default age of the marriage has become more year after year and I think he will continue to grow until the default age of marriage will be 40 years old and here would be a good reason is that the brain matures becomes in perfect stage at age of 40 years. Unlike the spectrum, there

are factors that have helped this idea is most important that the life become complex than it was on in the past and it is not longer easy and simple as in the past. Life become difficult because of the economic crisis and it became difficult to get a job that will provide a good living. In addition, boy or girl does not feel the responsibility and they need more time to realize the responsibility that lies on their shoulders because they depend on their parents.

Despite the fact that life has become difficult and complex and young people need more time to realize the responsibility that lies on their shoulders, this does not prevent the encouragement of early marriage, because it has many benefits for married couples and the community. Marriage means stability for both parties and reassuring in the soul and psychological comfort. Whenever a marriage was at an early age whenever the opportunity has become larger and most beautiful. It's become the largest because it's a promising with good future for both of them and they still in the prime of their youth. So they are in front of a bright future to create a family and get the children to enable them to raise their children at younger ages so that they can keep up with the times in the upbringing of their children rather than being a father at the age of forty and the child still in the age of ten, it would be difficult for both of them to understand each other and that's because the great difference of age. It's become the most beautiful because they do still enjoy the beauty and strength and health of their body as young people and they must exploit this force and this health to enjoy in marriage, instead of later marriage, which accompanied with many of the diseases that may disturb their lives.
